

Tshepong
Monthly engineering review data

20 April 2020

Generated on 21 April 2020 for:

Table of contents

1 Tshepong electricity 1

1.1 Electricity cost and consumption 1

1.2 Electricity time of use 1

1.3 Electricity maximum demand 2

1.4 Electricity average tariff 2

1.5 Breakdown of normalised electricity consumption 3

2 Tshepong cooling 4

2.1 Fridge plant average performance 4

2.2 Surface dam temperatures 4

2.3 Surface BAC average performance 5

2.4 63L BAC average performance 5

3 Tshepong compressed air 6

3.1 Workday compressed air profile 6

Tshepong electricity

1.1 Electricity cost and consumption

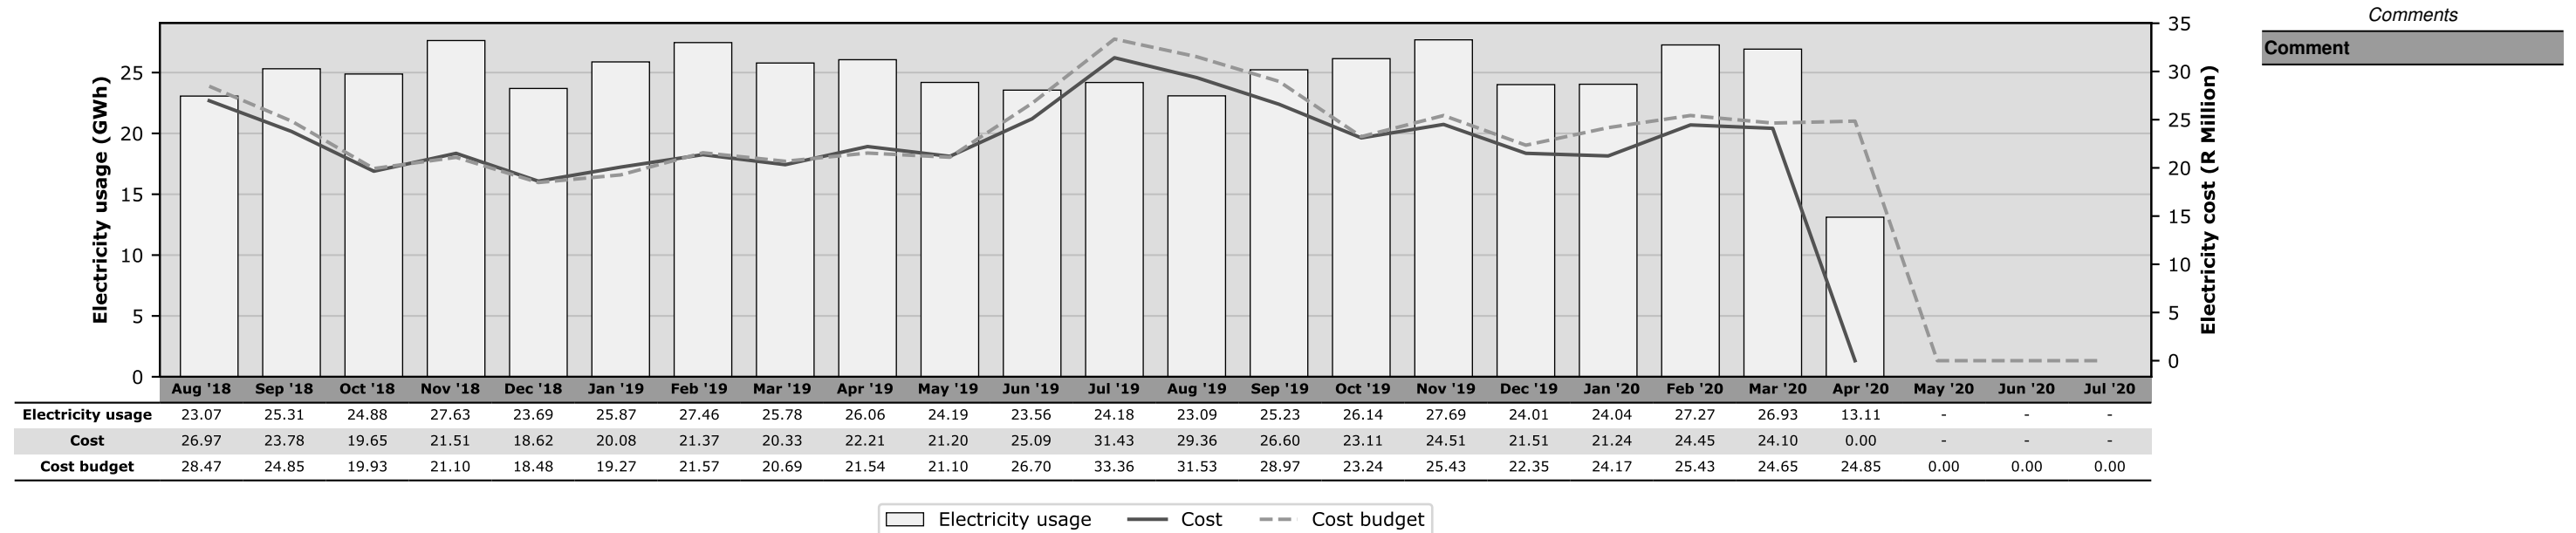

Figure 1.1: Electricity cost and consumption

1.2 Electricity time of use

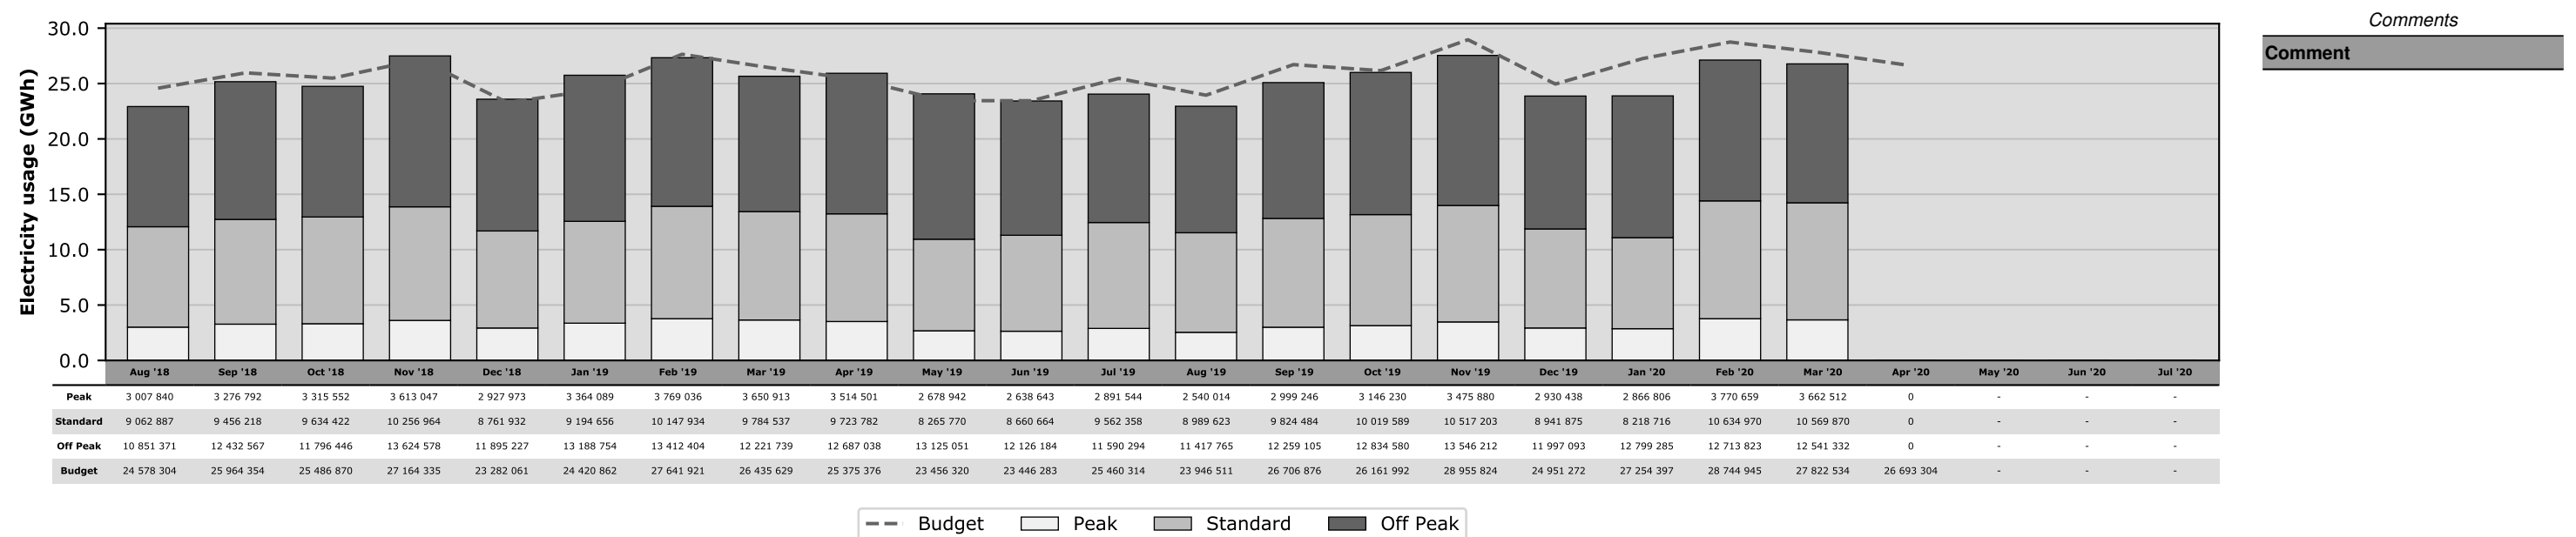

Figure 1.2: Electricity time of use

1.3 Electricity maximum demand

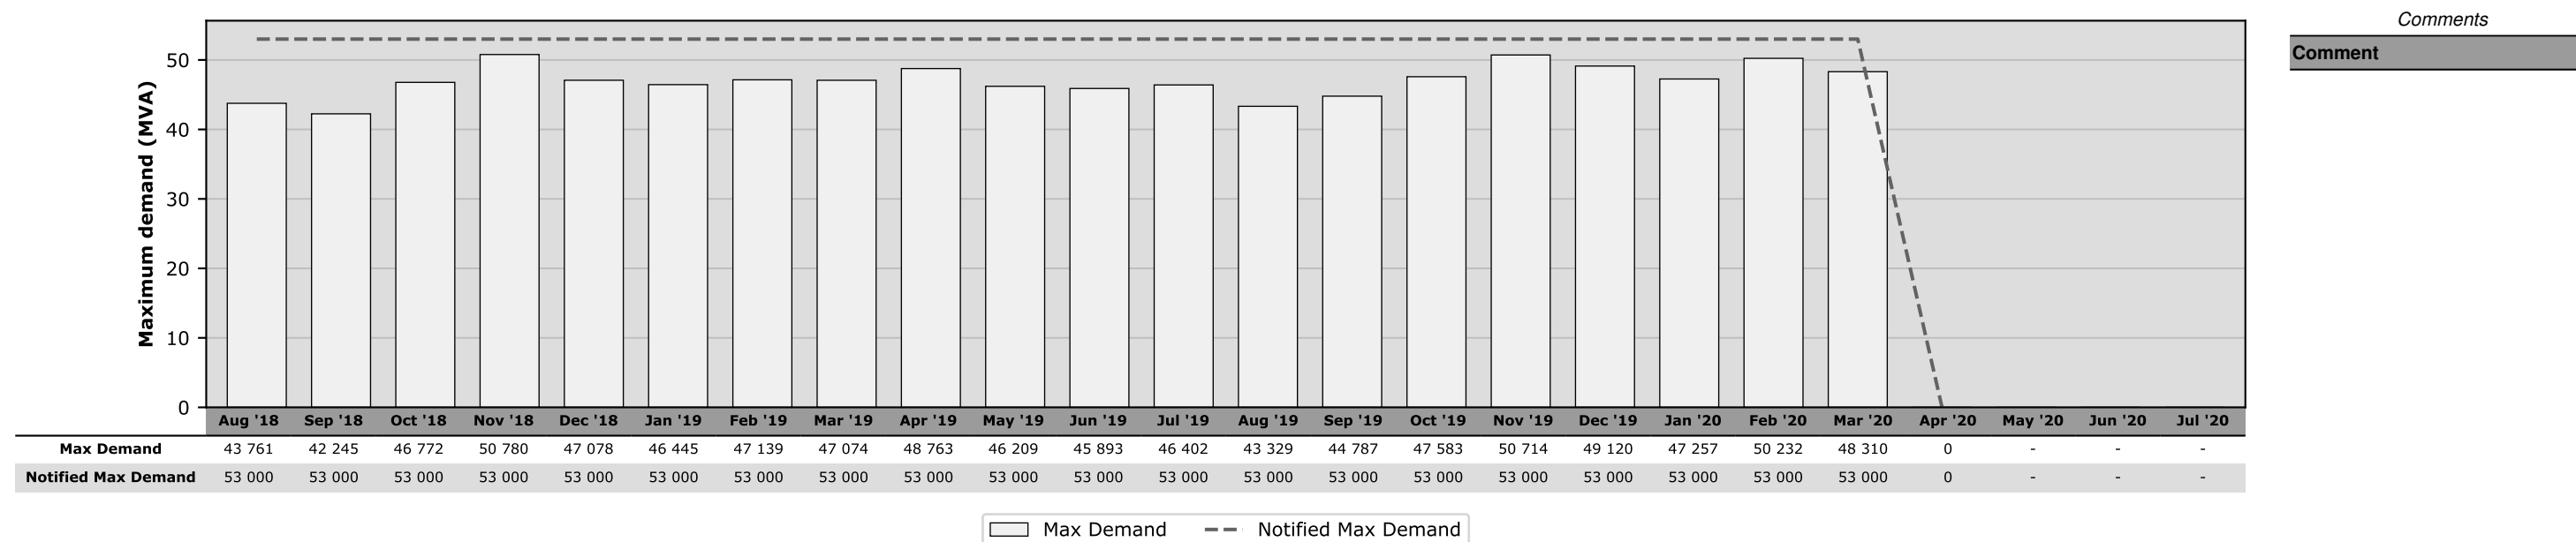

Figure 1.3: Electricity maximum demand

1.4 Electricity average tariff

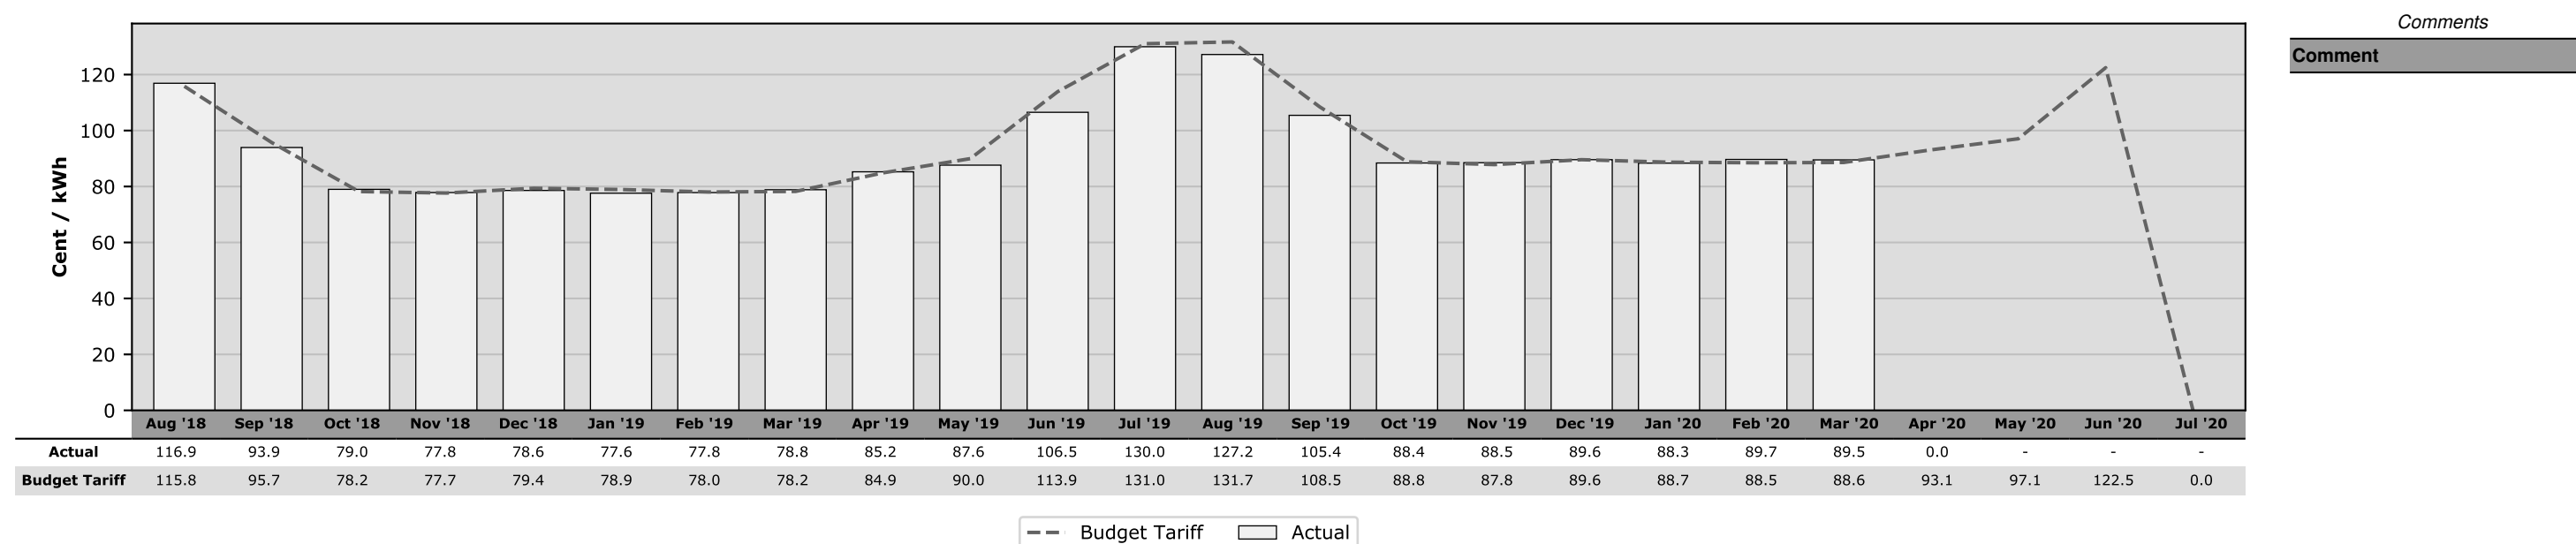

Figure 1.4: Electricity average tariff

1.5 Breakdown of normalised electricity consumption

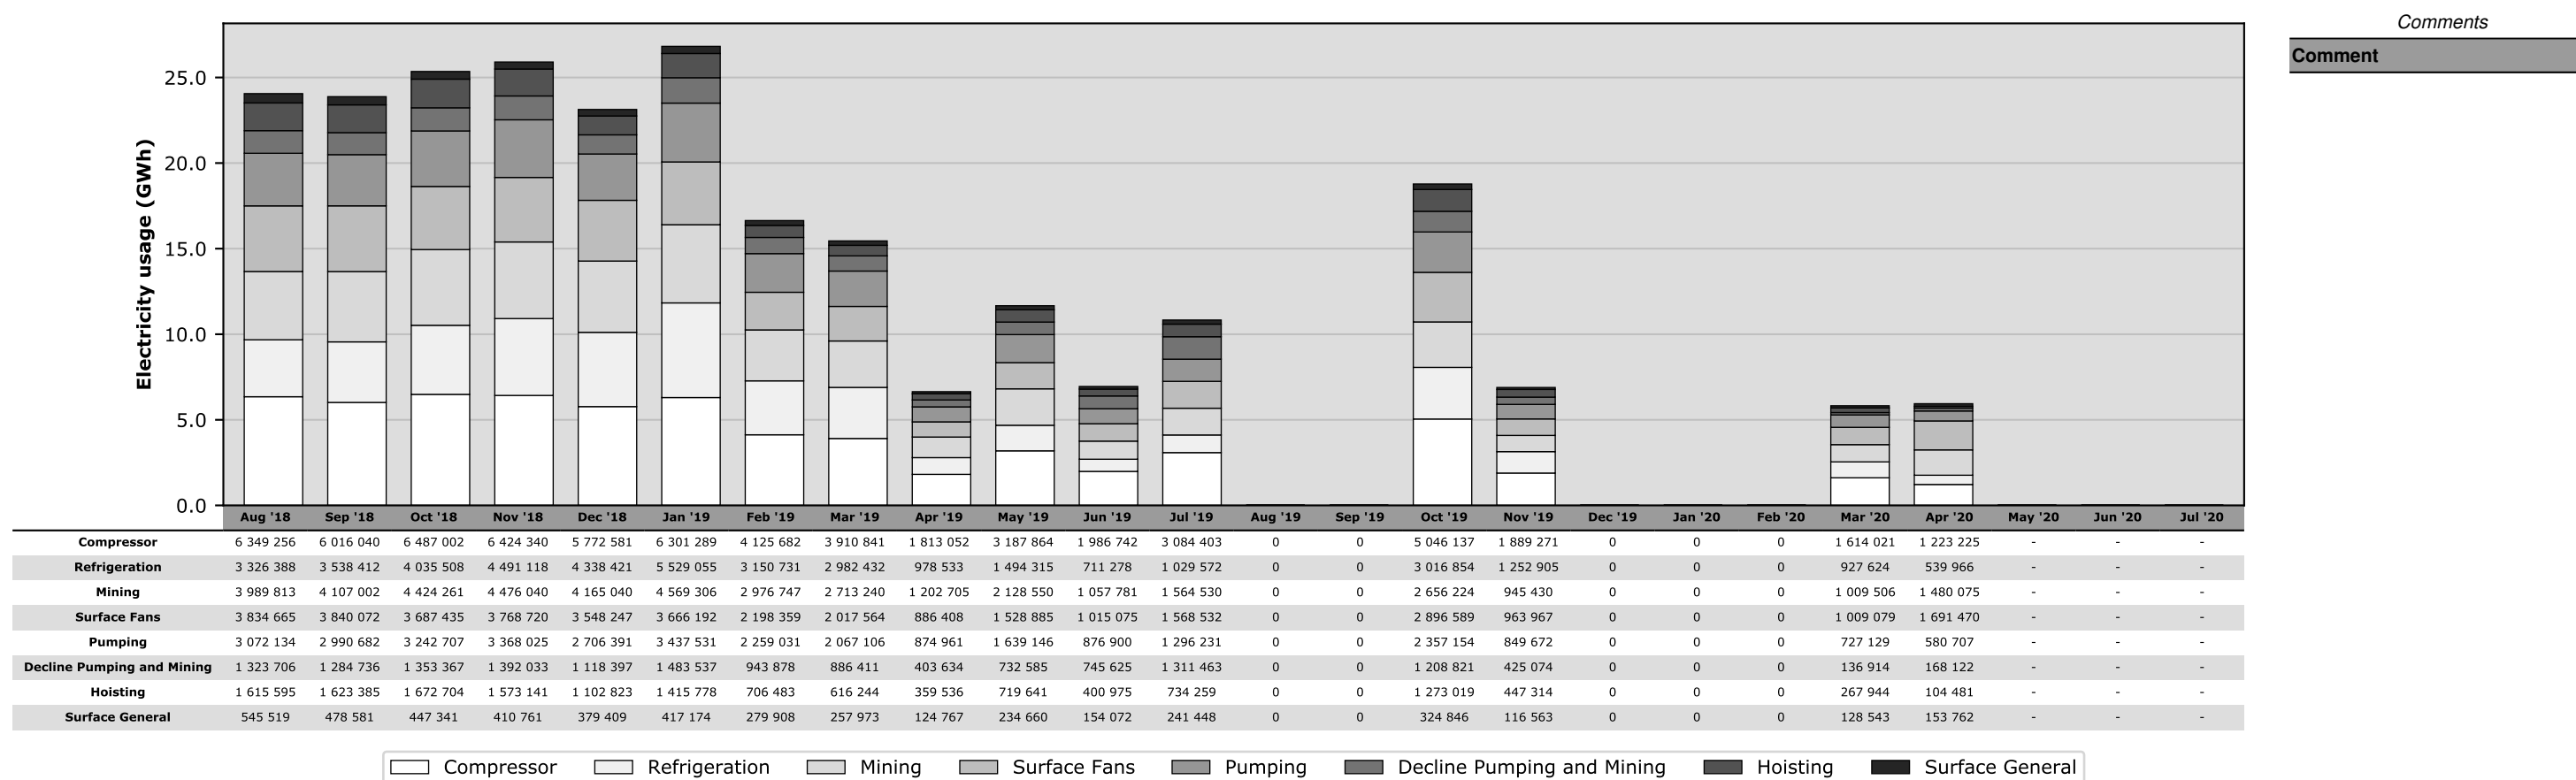

Figure 1.5: Breakdown of normalised electricity consumption

2 Tshepong cooling

2.1 Fridge plant average performance

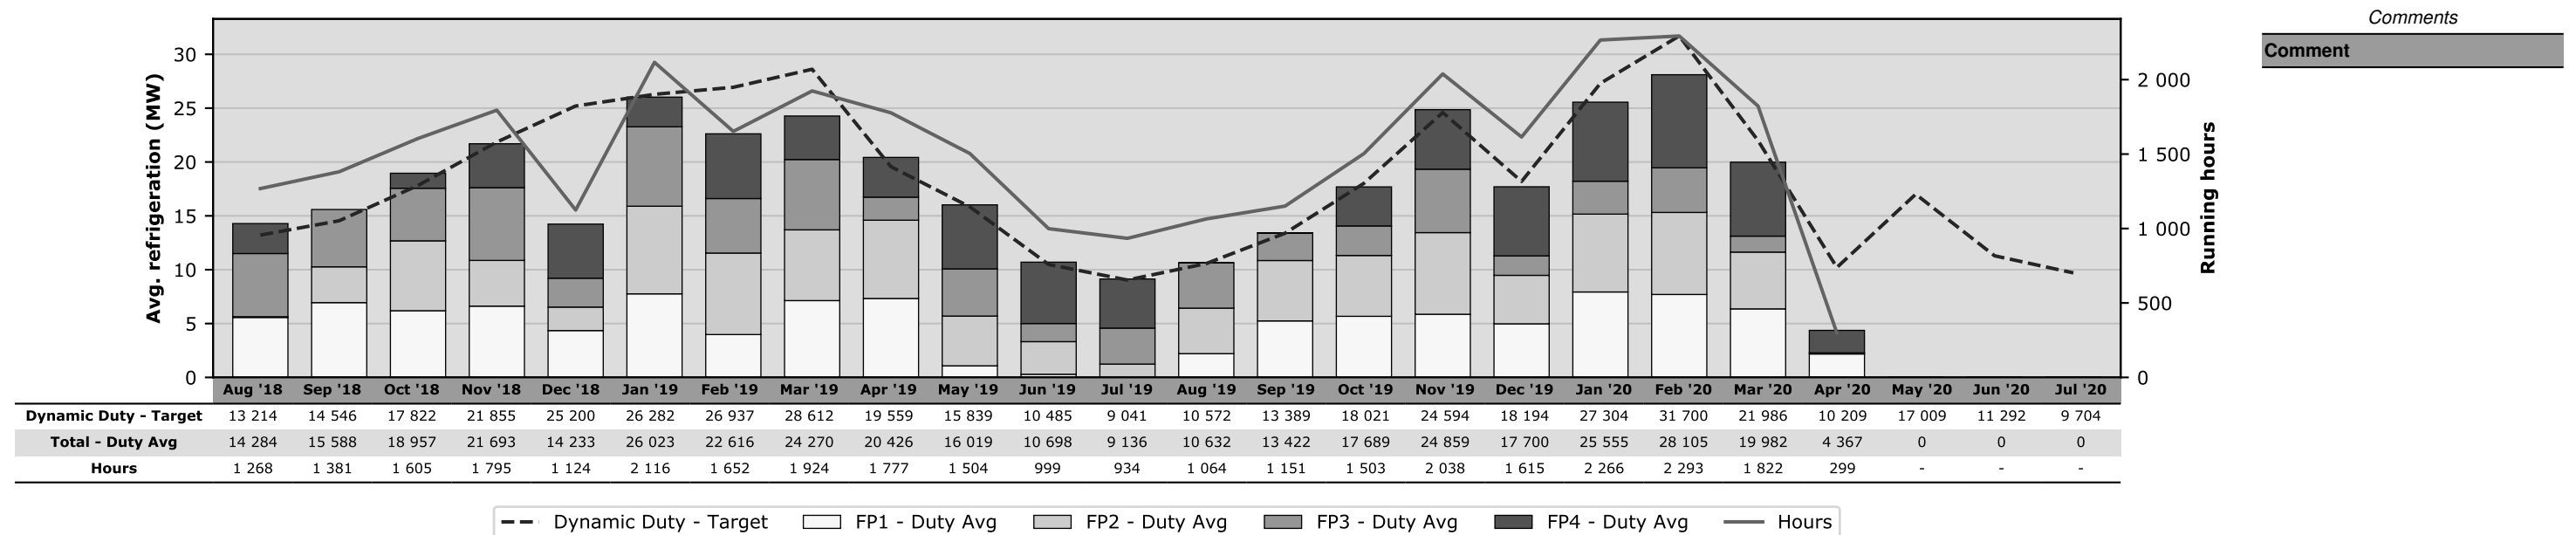

Figure 2.1: Fridge plant average performance

2.2 Surface dam temperatures

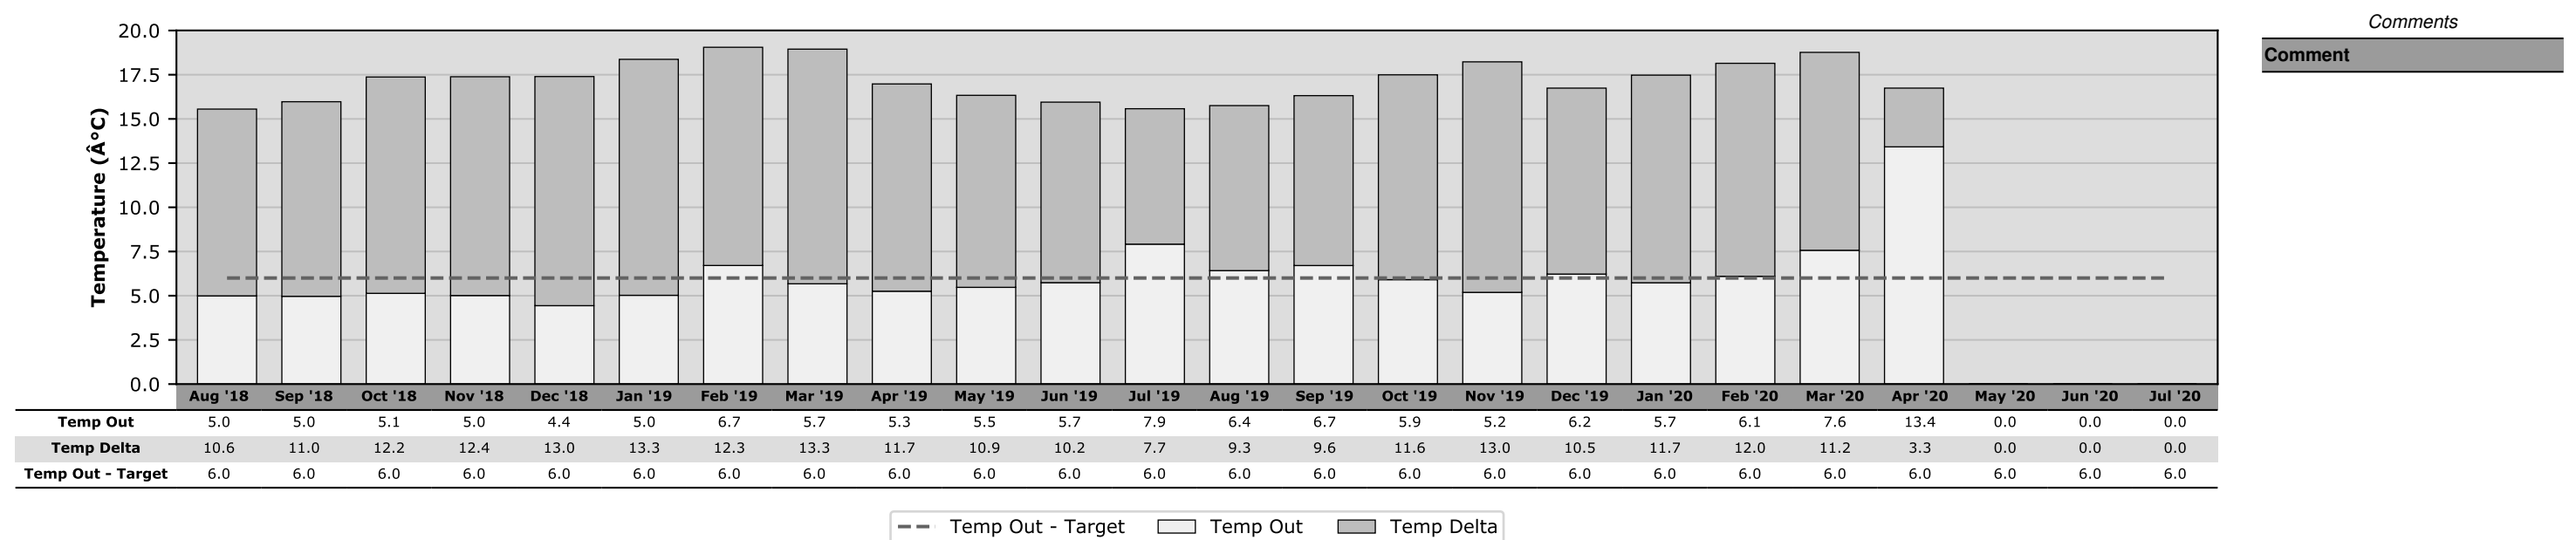

Figure 2.2: Dam temperatures

2.3 Surface BAC average performance

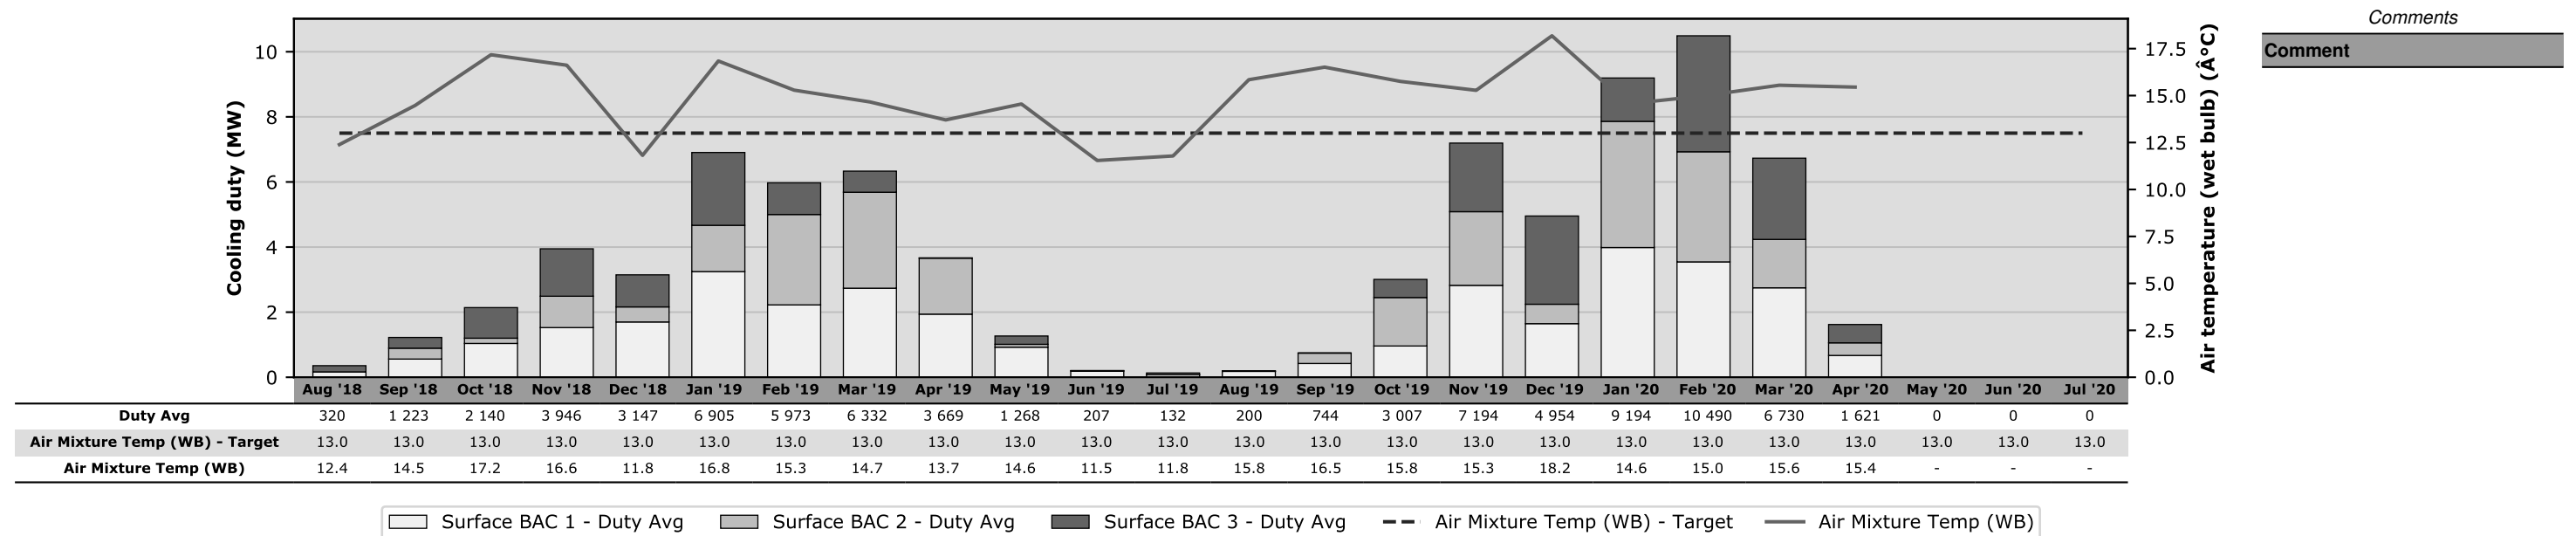

Figure 2.3: Surface BAC average performance

2.4 63L BAC average performance

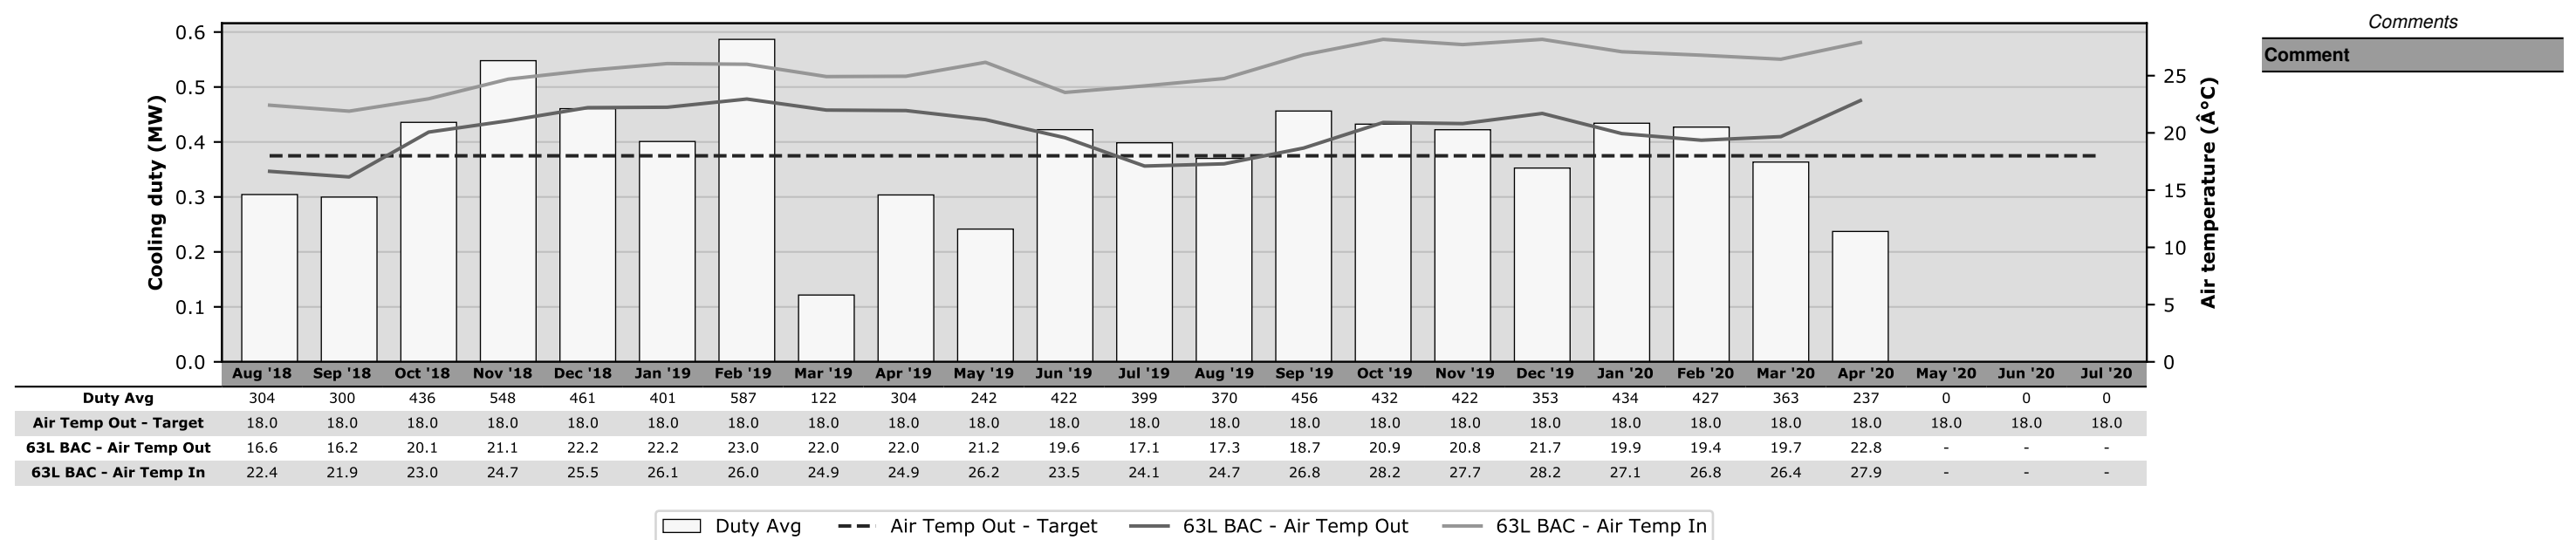

Figure 2.4: 63L BAC average performance

3 Tshepong compressed air

3.1 Workday compressed air profile

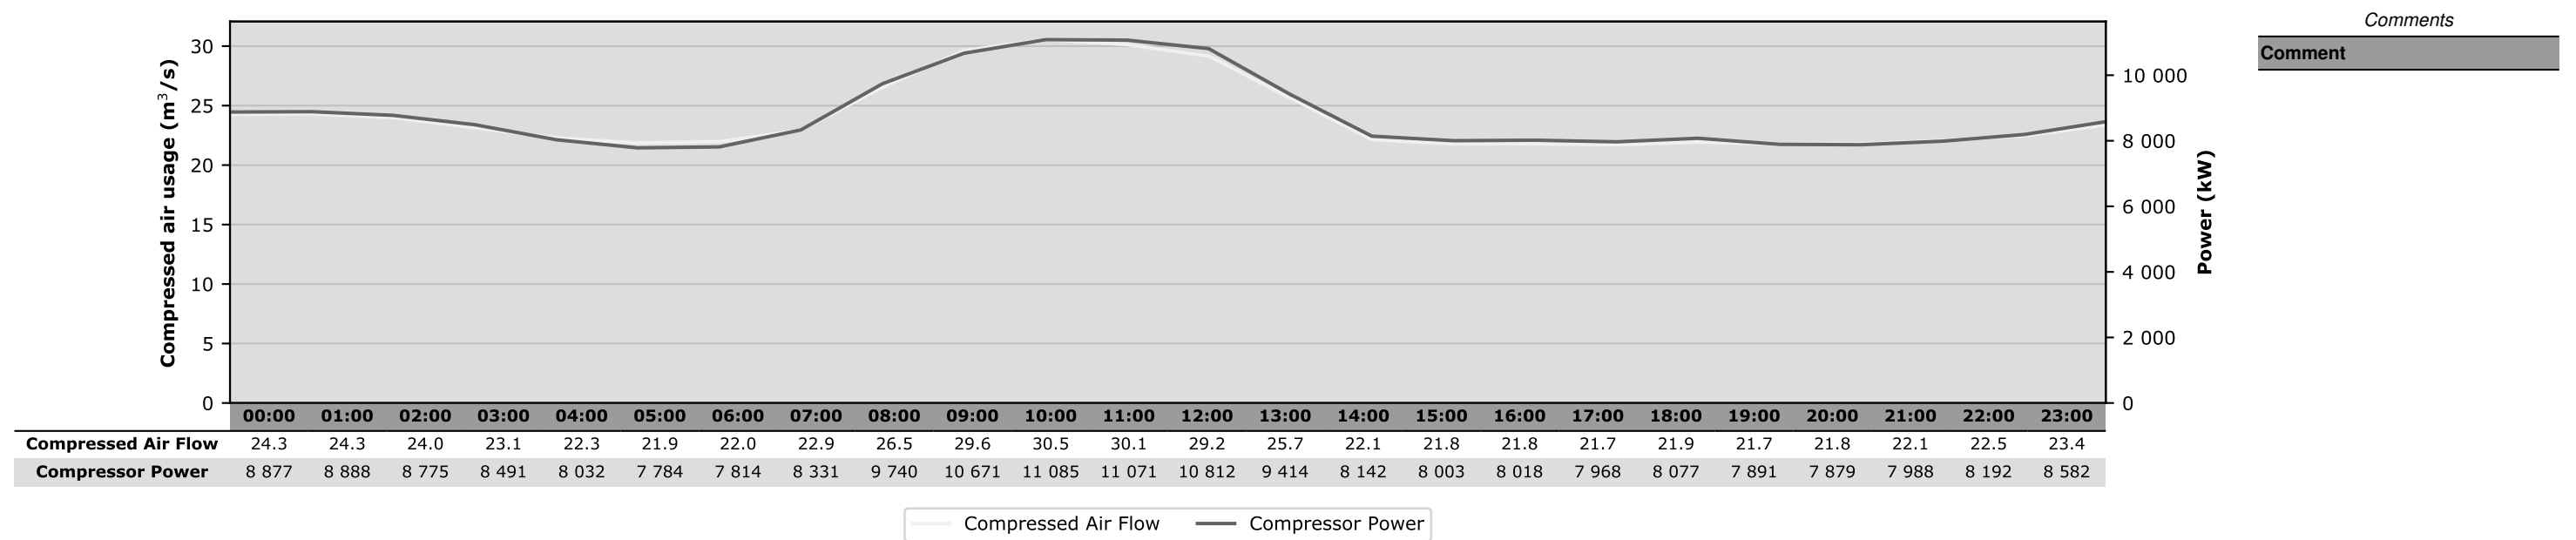

Figure 3.1: Workday compressed air profile
